Shift and Guidewire Integration for Optimized Claim Fraud Detection

In today's evolving insurance landscape, staying ahead of fraudsters is not just advantageous, it's imperative. The stakes are high, and the urgency to modernize outdated systems is essential. Here are three compelling reasons why C-suite executives must prioritize this initiative without delay.

Shift Claims Fraud Detection when integrated into **Guidewire ClaimCenter** workflows empowers claims professionals to uncover more fraud with unrivalled accuracy and process efficiency.

Leveraging AI vendors offers insurers:

Combining insurance industry expertise with advanced artificial intelligence and advanced data science delivers a highly focused solution that uncovers not only the multiple types of fraud committed by both individuals and networks, but also provides detailed rationale and contextual guidance for why an alert was generated and how to best investigate it. Seamless workflow integration with ClaimCenter: keeps claims professionals informed of claims status at all times; speeds up settlement for genuine claims and redirects suspicious claims to the SIU and permits claim professionals to review fraud scores, reason codes, and suspicious activities within ClaimCenter on the Shift Claims Fraud Detection tab.

Learn more about how **Claim Fraud Detection** when integrated with **Guidewire ClaimCenter** will impact claim fraud outcomes and process efficiency.
